# Budget Pay

The **Budget Payment Plan** is offered as another option in paying your electric bill. This program has been implemented to make paying your electric bill easier and avoid the high winter months getting you behind! It does not reflect your actual bill. What this means is you will be able to avoid paying those high winter electric bills by paying an amount that is calculated by averaging of 12 months' worth of electric usage each month. This is a continuous calculation, so there is the possibility that you will see your budget amount due each month fluctuate an estimated \$15-\$30.

In order to qualify for budget pay, your electric account needs to be in good standing and needs to have at least 12 months of prior history in order to effectively calculate the monthly budget amount.
